

KOÇ UNIVERSITY

Special Math-Science Seminar

Speaker: Dr. Joel Oswalt, Jobin Yvon, France.

Title: **Raman Spectroscopy Capabilities of Jobin Yvon**

Date and Time: **Wednesday, April 14, 2004, 15:30**

Place: Room Z42, Science Building, Koç University, Rumelifeneri Yolu, Sariyer 34450 Istanbul, Turkey.

Abstract: Jobin Yvon Raman, is the World's largest and most established manufacturer of dispersive Raman spectrometers and instrumentation. Comprising of the DILOR, Jobin Yvon and SPEX companies, we offer the broadest range of equipment covering analytical, research and industrial applications. Off-the-shelf and customised configurations can be supplied to meet specific needs. With over forty years of Raman experience, and well equipped applications Labs, JY can provide services right through from the earliest proof of principle investigations. With Raman microscopes, spectrometers, fibre-optic probes and macro samplers, measurements may be made from the widest range of samples. From semiconductors to bulk chemicals, from forensics to pharmaceuticals.
